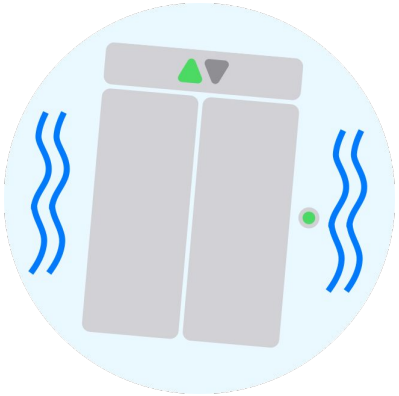
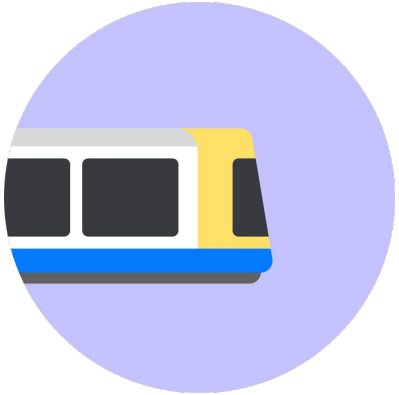
UPLIFT
Step-free Transport



UPLIF↑

Real people, working together

Thousands of commuting passengers, sharing one goal: getting everyone safely to their destination, every day.



Uplift improves the public transportation experience by empowering passengers with mobility impairments through crowdsourced information.

Report a Lift Fault

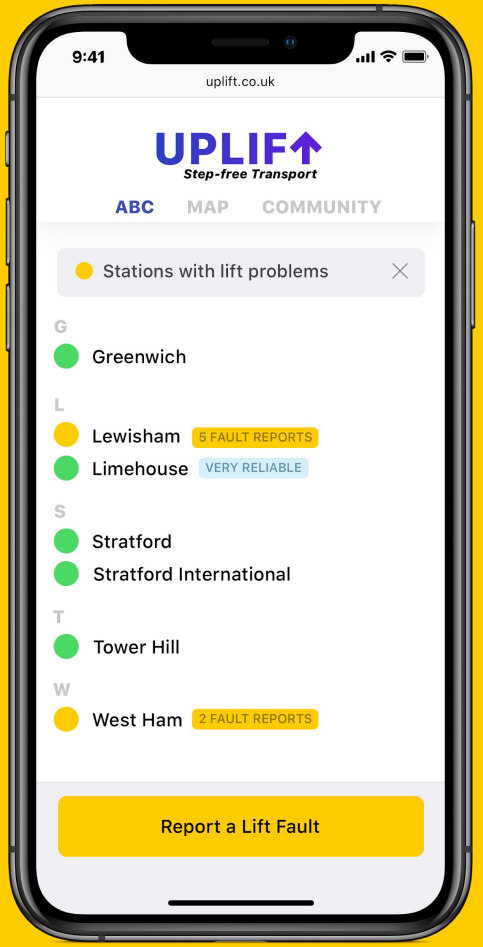
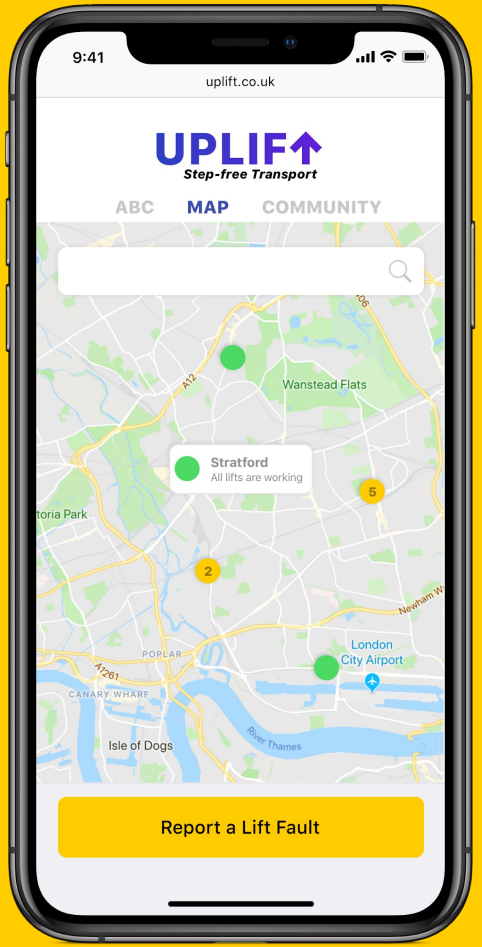
Network Rail data on faulty lifts enhanced with crowdsourced reports

Smart suggestions and reliability tags





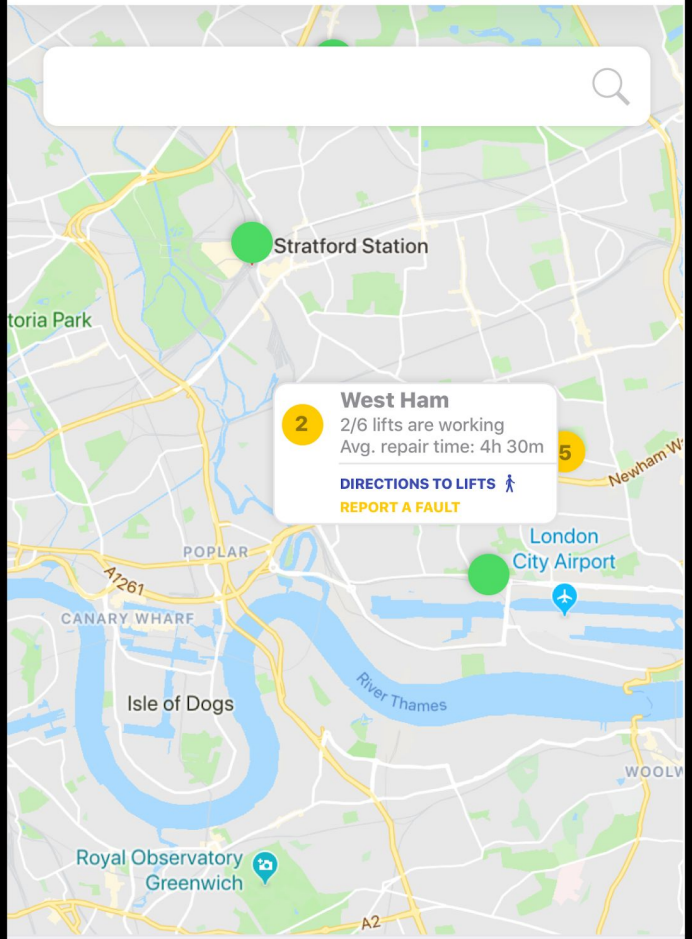
Easy to use interface

Live information

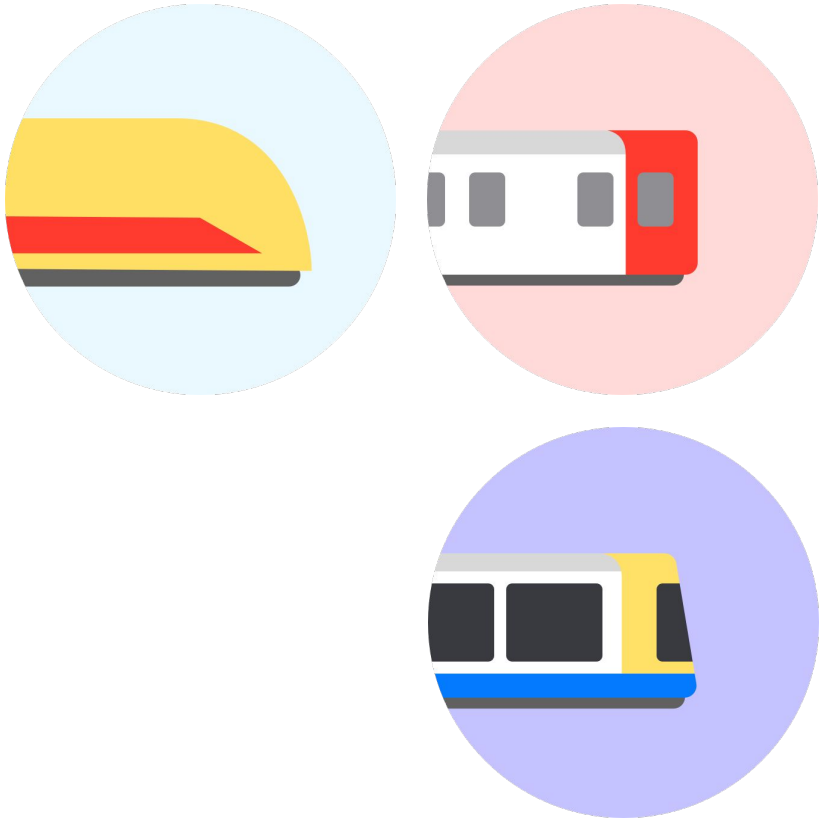
UPLIFT

Step-free Transport

ABC MAP COMMUNITY

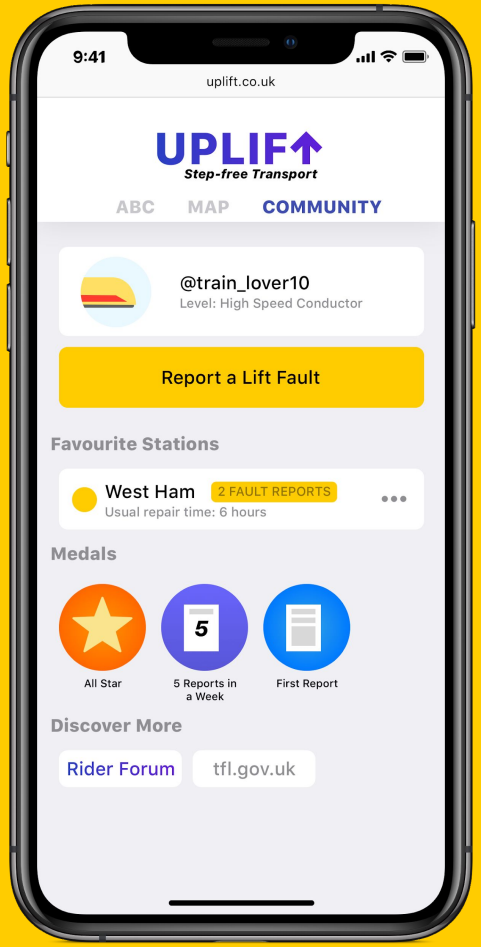


PERSONALIZED @COMMUNITY



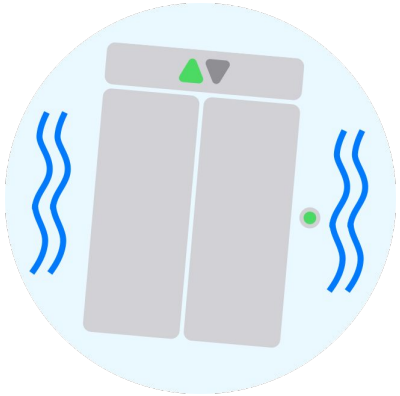
Rewarding experience gamified through milestones and achievements

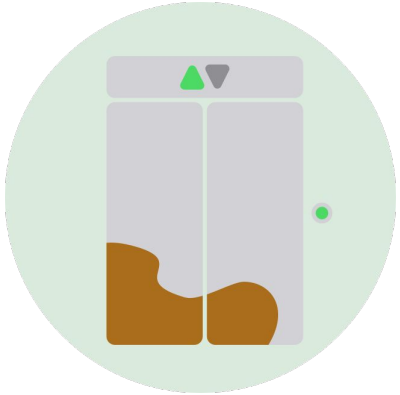
Community forum



Personalized information that is relevant and timely to the user

Quick feedback system to report lift faults

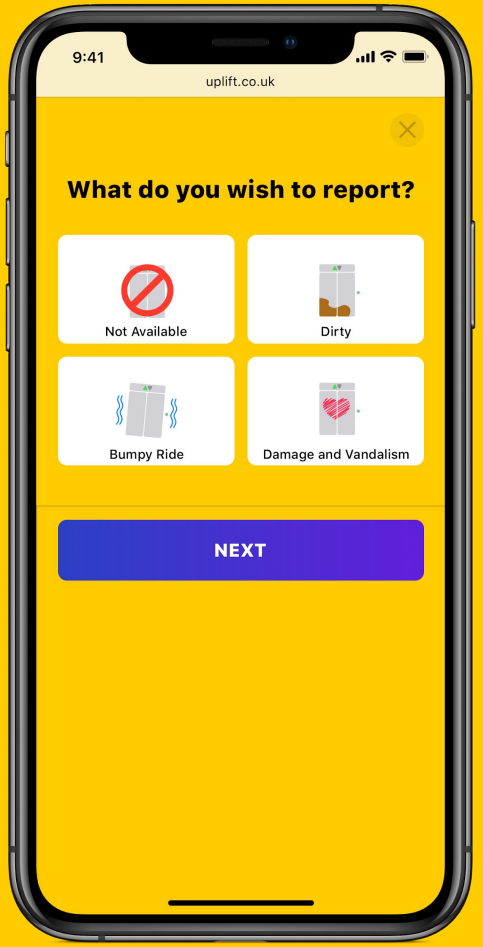


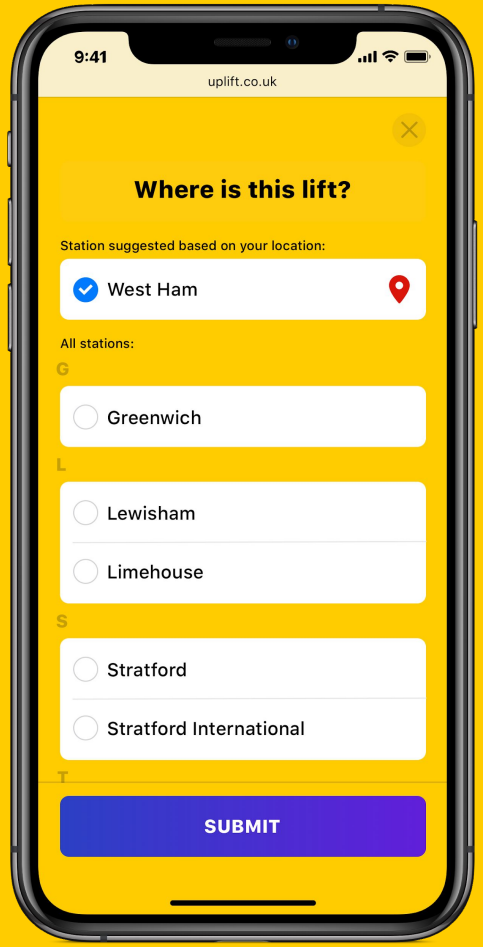


SMART FAULT REPORTING

Simple, accessible input

Reporting is fed into the Network Rail database





Use of device GPS for contextual results

Community based trust system that prioritizes trends instead of individual reports

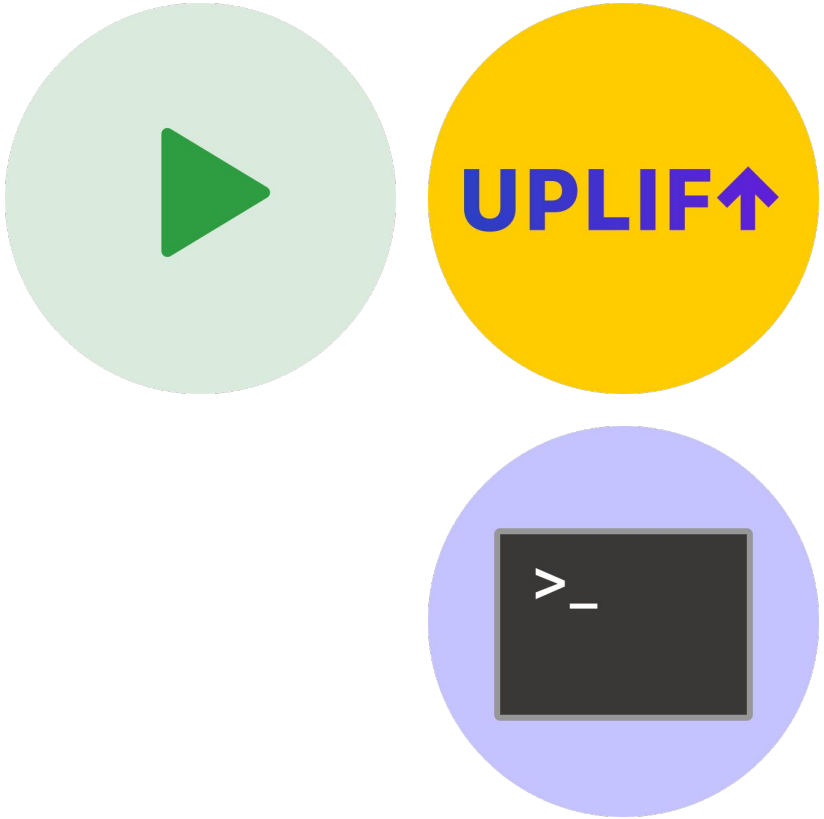
COMMUNITY BENEFITS

Increased access to public transportation

Enhanced trip planning

Increased satisfaction with public commutes

Easier to make carbon friendly choices



DEMO

Next Steps

Live updates for home/favorite stations

Emergency station contact

QR code in and around lifts for faster reporting
